

She had surgery six days ago.

It's important to you to get back to your life quickly after surgery. New surgical technology means you can have a faster recovery. Less postoperative pain. A shorter hospital stay. Even smaller scars.

At Durham Regional Hospital, surgeons are using state-of-the-art robotics for minimally invasive gynecologic procedures such as fibroid tumor removal and hysterectomy. This technology can also be used for urologic procedures and weight loss surgery.

Find out if Durham Regional can change what surgery means to you.
